

Goliath Resources Retains BUYINS.NET to Surveil Short Sellers & Issues Squeeze Trigger Report

- **Approximately 1.42 Million Total Shares Shorted in US Since October 2018**
- **Short Squeeze Has Begun as Stock Exceeds \$.066 SqueezeTrigger**

TORONTO, Aug. 26, 2019 (GLOBE NEWSWIRE) -- Goliath Resources Ltd. (GOT.V) (B4IE.F) (OTCQB: GOTRF) (the "Company" or "Goliath") announced today that it has retained BUYINS.NET, <http://www.buyins.net>, a leading provider of Regulation SHO compliance monitoring, short sale trading statistics and market integrity surveillance, has initiated coverage on Goliath Resources (OTCQB: GOTRF), (TSX.V: GOT), (Frankfurt: B4IE) after releasing the latest short sale data through August 22, 2019. The total aggregate number of shares shorted in the US since October 2018 is approximately 1.42 million shares. Approximately 64.38% of daily trading volume is short selling. The SqueezeTrigger price for all GOTRF shares shorted is \$0.066. A short squeeze has begun in the US as shares of GOTRF have exceeded this level. In Canada, GOT has a C\$0.1377 Trigger Price for a short squeeze to begin.

Friction Factor calculates if a fair market is being made in the shares of GOTRF. 57% of the previous 35 trading days have been positive or bullish-biased and 43% have been negative or bearish-biased.

Regulation SHO requires bona-fide market-making activities to include making purchases and sales in roughly comparable amounts. The Commission has stated that bona-fide market-making DOES NOT include activity that is related to speculative selling strategies for investment purposes of the broker-dealer and is disproportionate to the usual market making patterns or practices of the broker-dealer in that security. Likewise, where a market-maker posts continually at or near the best offer but does not also post at or near the best bid, the market-maker's activities would not generally qualify

as bona-fide market-making. Moreover, a market-maker that continually executes short sales away from its posted quotes would generally not be considered to be engaging in bona-fide market-making.

BUYINS.NET monitors GOTRF market-makers daily for compliance with Fair Market-Making Requirements.

About Goliath Resources Limited

Goliath is a precious metals project generator focused in the prolific Golden Triangle and surrounding area of northwestern British Columbia. It controls four highly prospective properties that include Bingo, Golddigger, Lucky Strike and Copperhead covering over 52,000 hectares.

All four properties have returned widespread mineralization of high-grade Gold, Silver and/or Copper from exposed bedrock in situ at surface. These new discoveries are the result of glacial recession and snowpack melting in geological settings where world class deposits have been found within the Golden Triangle and surrounding area

Their newly discovered Lorne Creek Au-Cu-Mo Monzonite Porphyry System at the Lucky Strike recently completed a successful drill program. They announced earlier today they completed three holes totaling 1741 metres containing widespread sulphides from surface, and down to their longest hole of 718 metres; all holes remain open.

About BUYINS.NET

BUYINS.NET, <http://www.buyins.net>, monitors trading in all US stocks in real time and maintains massive databases of short sale and naked short sale time and sales data, short squeeze SqueezeTrigger prices, market-maker price movements, shareholder data, statistical data on earnings, sector correlation, seasonality, hedge fund trading strategies and comparable valuations.
